Profile

I am a Full Stack Engineer with a passion for problem-solving and quality. I have experience in React, Node.js, Express, and Angular. I have contributed to key projects, managing a wide variety of dependencies to create interactive and efficient solutions in both front-end and back-end development.

Experience

TIKILY | IT ENGINEER (FREELANCE) | JULY 2025 – PRESENT

As an IT Engineer at Tikily, I work as a freelancer providing maintenance, support, and development for web platforms and websites, ensuring their proper operation and continuous improvement. I perform quality assurance, identify and resolve technical and functional issues, manage user accounts and access, and handle domain and DNS configuration, contributing to system availability, security, and operational continuity.

SUBCARGO | IT ENGINEER | DECEMBER 2021 – JANUARY 2025

As a Full Stack Engineer at Subcarga, my role was integral within the IT field. I was responsible for requirements gathering, quality assurance, bug fixing, and code review across numerous pull requests. I supervised junior developers, conducted technical tests, and participated in interviews. Additionally, I carried out cloud integrations on Google Cloud Platform for projects in React and ExpressJS. I developed new endpoints, designed data transfer objects, and created controllers for new entities, as well as schemas for MongoDB. All these responsibilities were performed within an agile framework.

GLOBALHAP | SOFTWARE DEVELOPER | JANUARY 2021 – DECEMBER 2021

During my time as a Full Stack Engineer at GlobalHap, I was tasked with building components from scratch, refining existing ones, and developing full web pages. I updated modules with business logic, debugged and fixed errors, and created new entities and schemas in MongoDB for the backend, including data transfer objects (DTOs) and custom endpoints.

IDEAL CONTROL | SOFTWARE DEVELOPER | JANUARY 2020 – FEBRUARY 2020

As a developer and maintainer, I was responsible for helping implement a real-time monitoring system for the salmon farming industry in southern Chile. I developed components and pages following UX/UI design specifications and technical requirements within the React development framework.

Languages

- Spanish (Native)
- English (Advanced)

Education

- Pontificia Universidad Católica de Valparaíso | Bachelor's Degree in Computer Engineering
- Certificate in IBM Python for Data Science, AI & Development
- Certificate in IBM Building Generative AI-Powered Applications with Python

Technical skills

- JavaScript (Advanced)
- Java (Intermediate)
- Python (Intermediate)
- Typescript (Intermediate)
- SQL (Intermediate)
- C# (Basic)
- Google cloud (Basic)
- React (Advanced)
- TailwindCss (Advanced)
- MongoDB (Advanced)
- Node.js (Intermediate)
- Angular (Intermediate)
- Next.js (Intermediate)
- ExpressJS (Basic)
